Lead Trace

Discover prospects.
Keep sales moving.

Lead discovery, a built-in CRM, and cited sales research in one workspace.

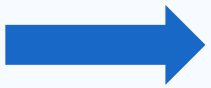

Current product · 24 October 2026 · leadtrace.online

InsightIQ is now Lead Trace

We listened to feedback from industry professionals and shaped our next stage around the needs of sales teams.

InsightIQ

Lead Trace

Industry feedback shaped a connected workflow: discover leads, manage relationships, and prepare with evidence.

A connected sales workflow

For people who sell

B2B sales teams
Agencies pitching clients
Founders finding customers

Questions the workspace answers

Who fits our buyer profile?
What should happen next?
Which evidence supports the brief?

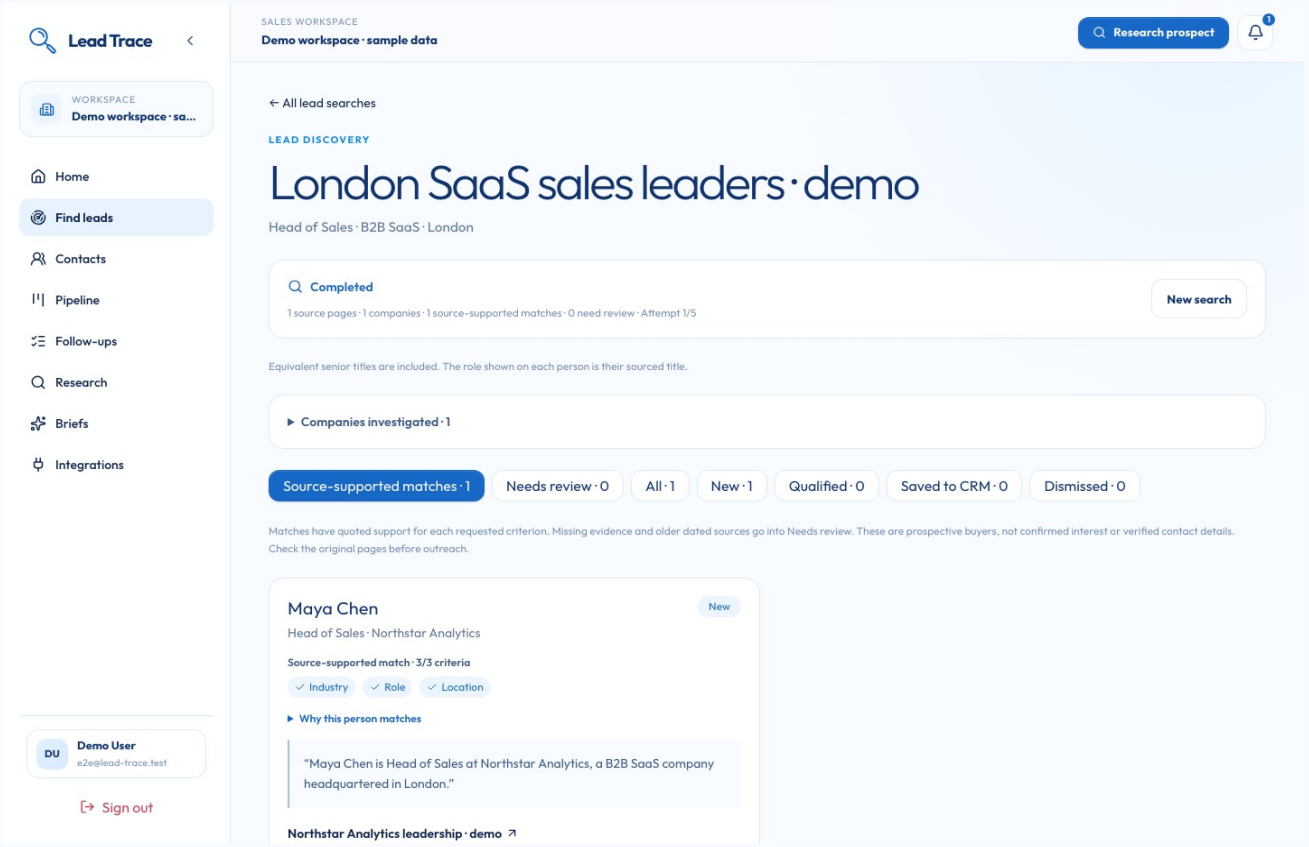

Keep discovery, CRM, and preparation connected.

Source quotes support review. Follow-ups keep the next action visible.

Find leads with evidence

Start with a buyer profile

Search companies, then people. Check role, industry, and location evidence before saving.

Search, full-page reads, and site crawls

Fictional demonstration workspace

Lead Trace

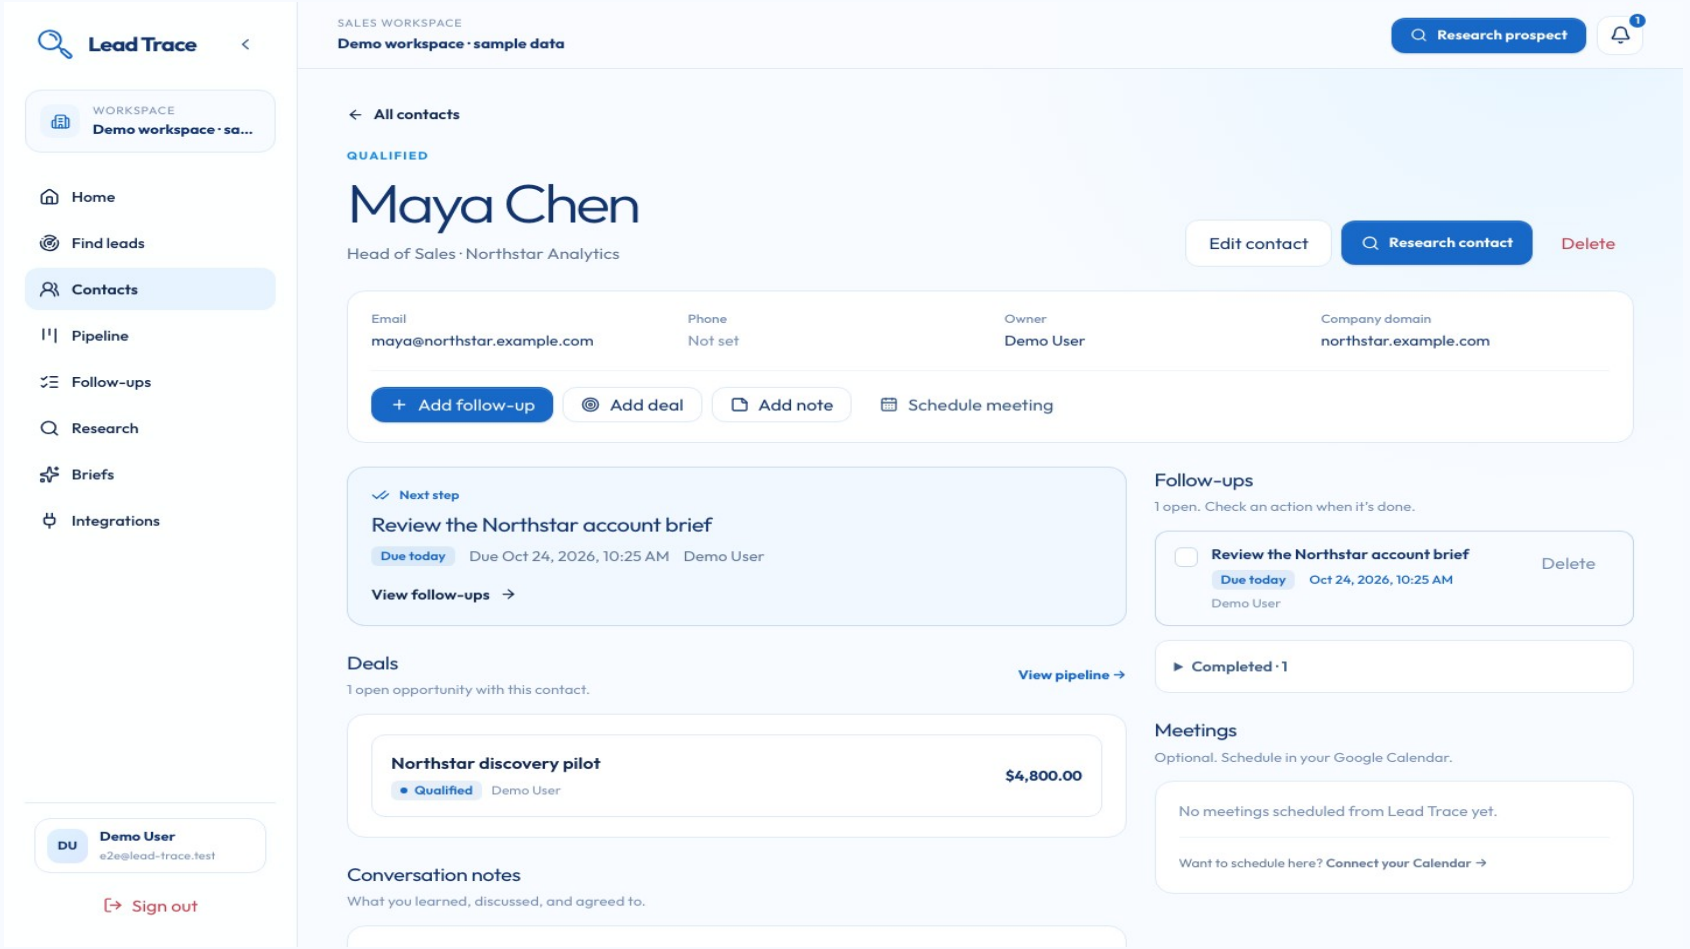

Discovery to the next sales action

From buyer profile to the next action, with source evidence attached

Evidence stays attached when a reviewed lead becomes a CRM contact.

CRM built around the next action

Contact context

Keep ownership, notes, and research with the person.

Deal tracking

Track stage, value, currency, and expected close.

Next action

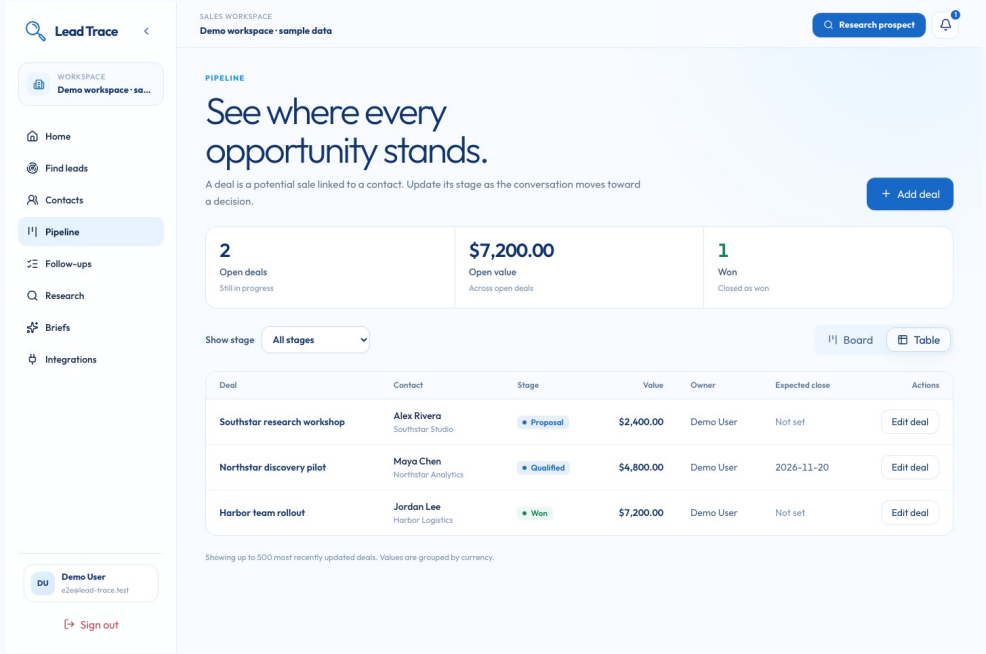

Set a follow-up or schedule a meeting.

Fictional demonstration data

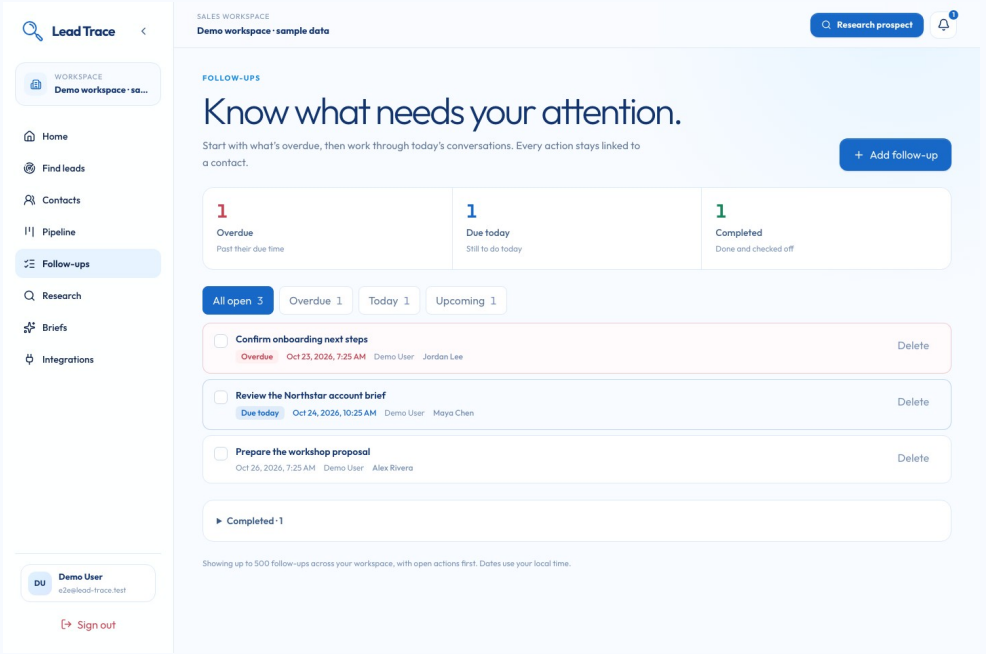

Pipeline and follow-ups

Track the opportunity and the next action in the same workspace

Board and Table views

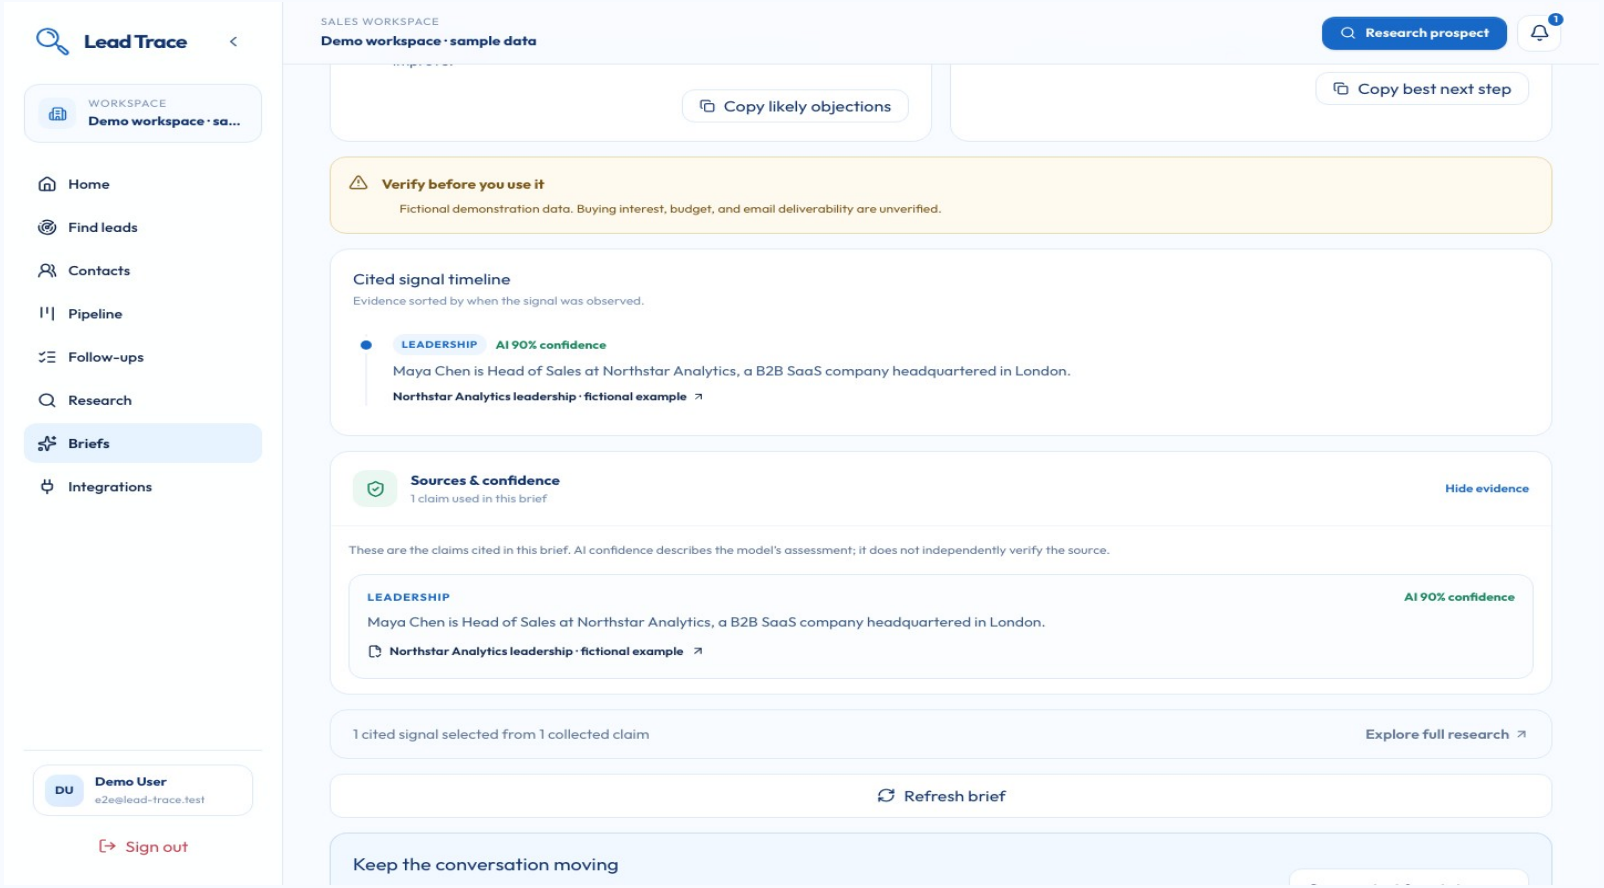

Due today, overdue, or upcoming

Deal stages, ownership, and value remain visible. Completed follow-ups can be reopened.

Fictional demonstration data. Follow-ups are tracked actions; automatic reminders are not implemented.

Cited research for the next conversation

Inspect the source

Each key signal links to its stored claim and source URL.

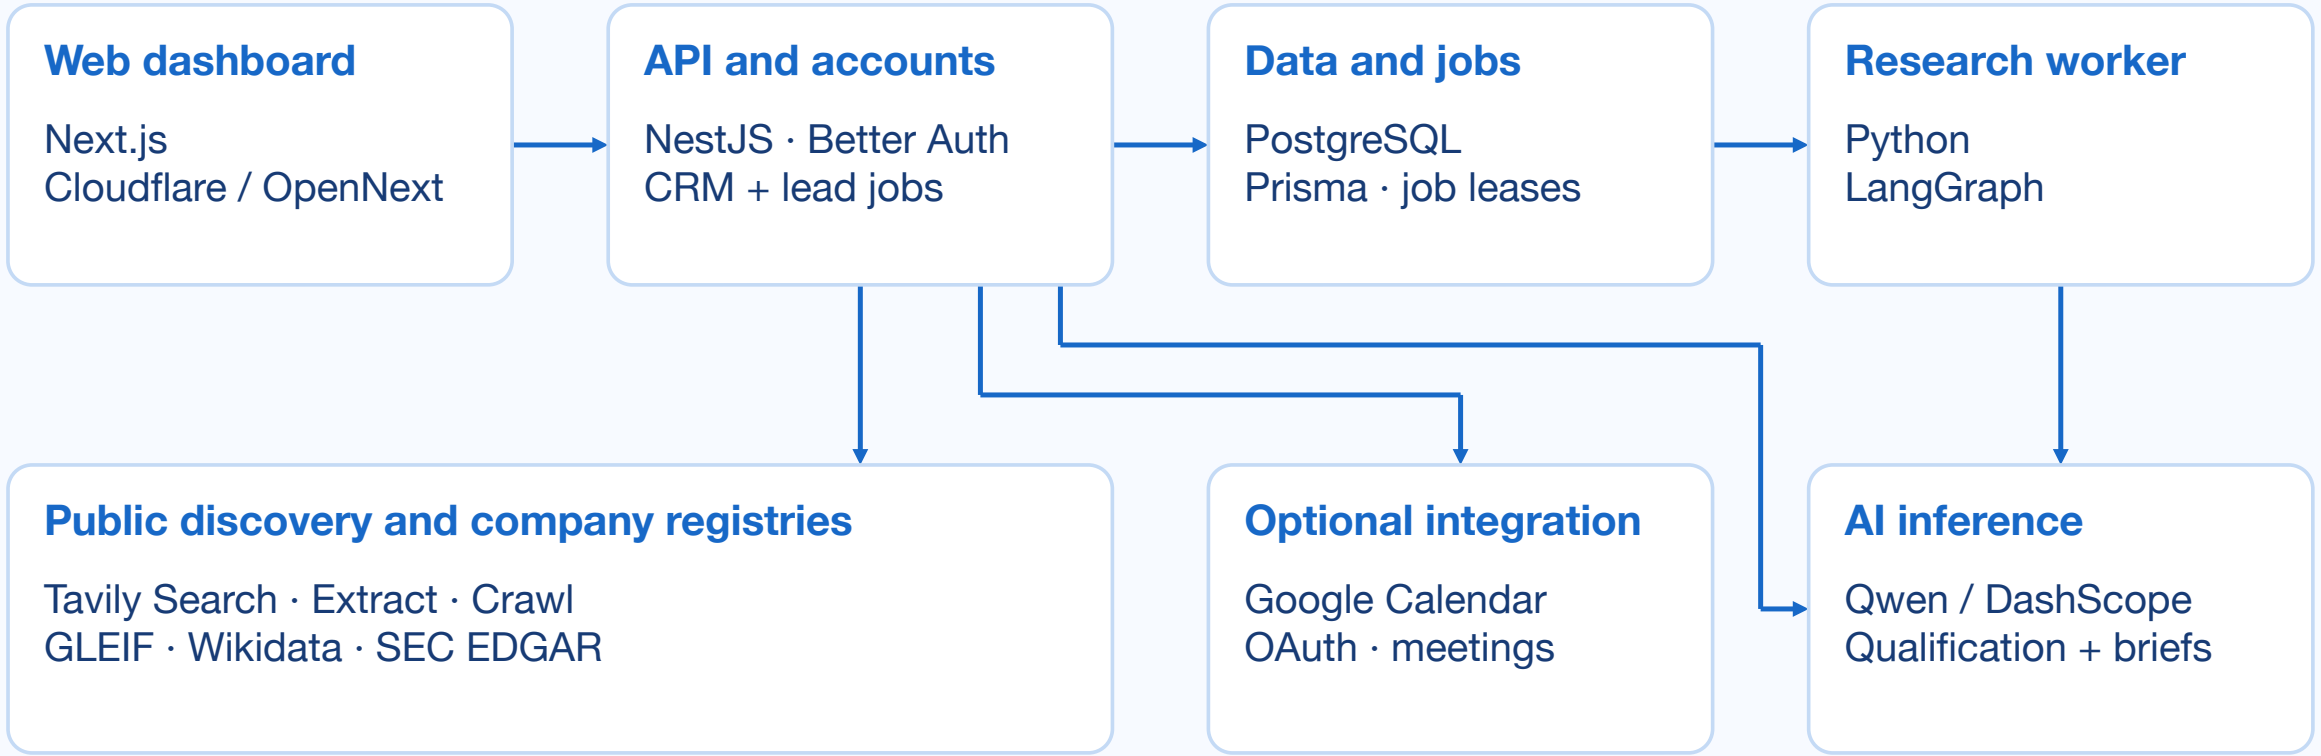

Review and reuse

Check gaps, adapt the outreach draft, then copy or export.

Fictional demo data. A source claim, a hypothesis, and a question stay distinct.

Lead Trace architecture

Discovery and CRM in the API; research in a separate background worker

The API and research worker share source evidence and the configured model provider.

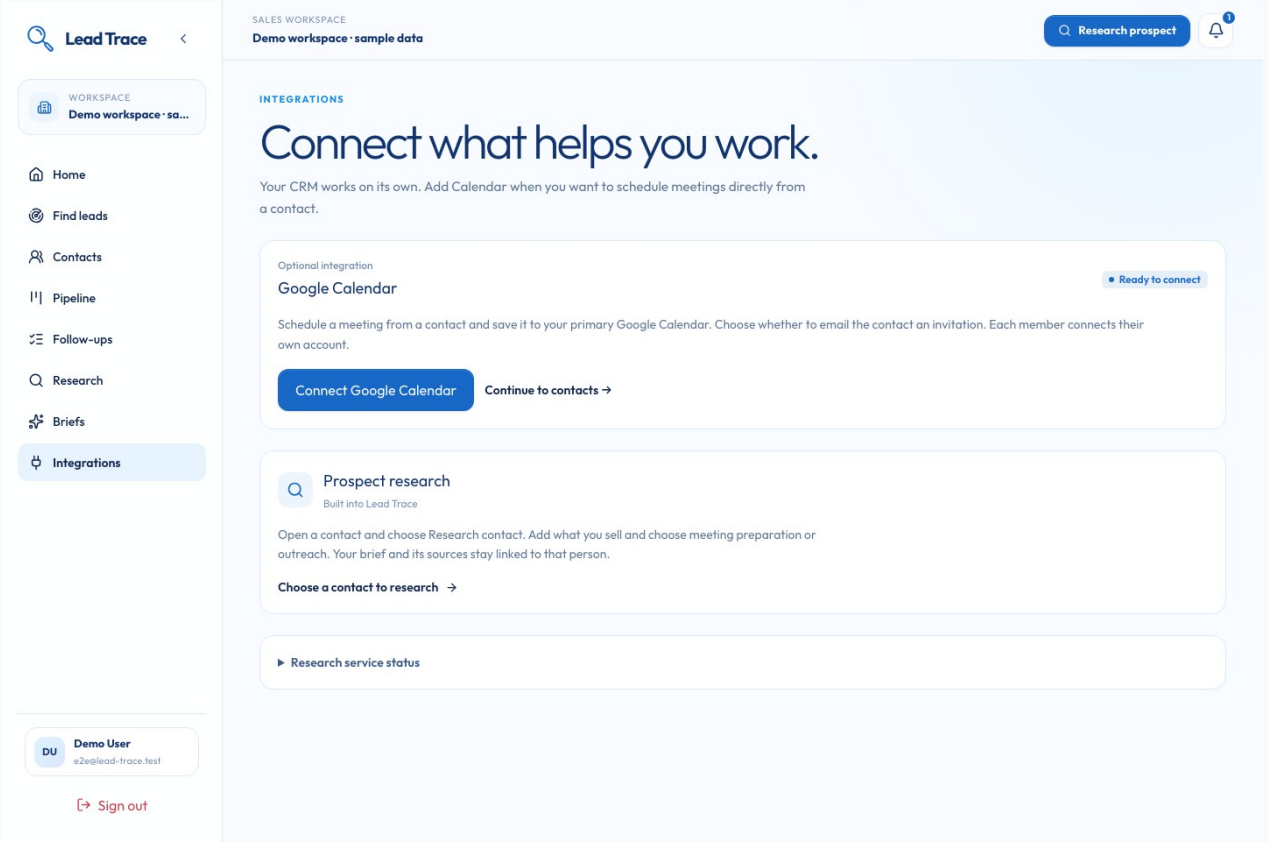

Meetings and follow-ups

Optional Google Calendar scheduling, with explicit invitation control

Connect your own Calendar

Create an event from a contact.
Choose whether to invite the contact.

You can track a follow-up
without connecting Calendar.

Account authorization is required. Invitations are opt-in; two-way Calendar sync remains planned.

Live validation and next priorities

What has been demonstrated, and what remains ahead

Live audit · 23 October 2026

9 prospective buyers discovered
1 matched all sourced criteria

CRM save to a completed cited brief
11 research sources · 15 evidence items

Next priorities

Shared company records
Contact merging
Recurring lead searches
Email integration
Two-way Calendar sync

One live cohort, not a market-coverage benchmark. Buying intent and contact details remain unverified.

Lead Trace

Find the lead.
Know the context.
Track the next step.
